

AFRICA SUPPLY CHAIN CONSULTING POWERHOUSE

Connecting Possibilities. Delivering Growth.

ABOUT ASCCP

ASCCP is a pan-African supply chain consultancy with over 30 years of on-the-ground industry experience. We connect people, processes and possibilities to build resilient supply chains that drive Africa forward — combining certified expertise, a first-class engineering background and deep experience across African regulatory and logistics environments.

Founder & Director: **Stephen Makau**

- Demand Planning Training / ERP Integration
- Warehousing Operations
- Customs Management Consulting
- Logistics Management into Africa: Marine / Road / Air
- Supply Planning Training / ERP Integration
- Supply Chain Operations into Africa
- End-to-End Supply Chain Training / Examination

INDUSTRIES WE SERVE

Manufacturing

Late inbound materials, excess stock and line stoppages — planning, inventory policy and ERP aligned so production runs to plan.

Mining & Resources

Remote sites, long lead times and customs delays — resilient inbound logistics and customs-ready processes.

Energy

Critical spares, project cargo and strict compliance — better procurement-to-delivery visibility and spares availability.

Retail & FMCG

Stock-outs on fast movers, slow stock and costly distribution — tighter forecasting, replenishment and warehouse flow.

Agriculture

Seasonal peaks, perishables and thin margins — storage, transport and export flows planned to reduce spoilage and delay.

Government & NGOs

Procurement rules, donor timelines and hard-to-reach locations — transparent, auditable supply chains and trained teams.
